

# Technology for Education Development Interns

Project Title	Technology for Education Development Interns
Project Summary	You will work closely with USAID's Education Technology Specialist and other subject matter experts to support an ambitious global program focused on effective uses of a varied range of technologies to positively impact educational outcomes principally in low-resource, developing country context.
Country	United States

## Project Description

As VSFS interns, you would support a diverse range of research, events, and other activities focused on the use of information and communications technology for education (ICT4E) in developing countries. Among other activities, we will jointly identify a topic area (e.g., assistive technologies, subject matter learning, teacher professional development, education in crisis and conflict settings) which you will follow, synthesize and write-up relevant knowledge, and help in the dissemination of good practice information. This will be an amazing year for deepening USAID's contributions to the global ICT4E agenda and you can be part of this!

## Required Skills or Interests

### Skill(s)

Analytical writing

Design thinking

Editing and proofreading

Educational design

Graphic design

Infographic design

Research

Storytelling/blogging/vlogging

Survey / polling design

Writing

## Additional Information

You'll be working with a team of other VSFSers to support a general range of ICT4E knowledge products and activities. We'll co-identify specific ICT4E subject areas with you which you'll be responsible for following and developing periodic written and digital products. You will also be engaged in two global ICT4E initiatives we support, the All Children Reading Grand Challenge for Development, focused on innovative uses of technology to accelerate early grade reading in developing countries, and the mEducation Alliance, a consortia of donor and other leading stakeholder agencies with common interest in technology for education in developing countries.
